Our Chiropractic Principles/Foundation:

- The body is self-healing and self-regulating.
- The nervous system controls the body's ability to function and adapt (heal and regulate).
- Spinal misalignments (vertebral subluxations) cause interference to the nervous system.
- Chiropractors locate and correct vertebral subluxations with specific spinal adjustments.
- Adjustments remove pressure from the nervous system and allow the body to heal.

Health, Wellness and Chiropractic Care

Throughout life, stresses and traumatic events can damage the spine and nerve system. These **stresses** may be **physical, chemical,** and/or **emotional** in nature. Understanding the physical, chemical, and/or emotional stresses that have acted upon your spine and nerve system assists us in serving you. We thank you in advance for answering the following questions as accurately and completely as possible.

History of Physical Stress: Research indicates that the birth process can cause trauma to a baby's spine and nerve system. Please indicate to the best of your recollection how you were birthed.
